Dear Representative Bonilla:

We have lived in Quihi for more than 30 years and want to express our support for the railroad that Vulcan is trying to build. We still live in Quihi and enjoy this area very much. We disagreed with some of our longtime neighbors over the rock quarry, but the majority of us agree that the railroad is better for our community than a fleet of trucks.

Those trucks would be using the same roads as our cars and school buses. They would be putting exhaust into our air and dripping oil and gas on our roads. Also the trucks would be a nuisance for our community. We would prefer to be without the noise and traffic that comes with the trucks. Trains would be much cleaner and safer as well. By far we prefer the trains.

Please support us on this and pass your opinion onto the government agencies that make the decision about the railroad.

Sincerely,

*Wayne L. Marty*

*Jean Marty*
